

CURRICULUM VITAE

Full name: Benjamin Keith Diggles
Position: Managing Director, DigsFish Services Pty Ltd.
Address: Brisbane, QLD, AUSTRALIA, ben@digsfish.com
Academic qualifications: PhD. B.Sci (Hons. 1st class)

Patents: 4

Professional positions held:

Dec. 2003 - present

Managing Director, DigsFish Services Pty Ltd. <http://www.digsfish.com/>

Job description: Provision of an independent aquatic animal health consulting service for the fisheries and aquaculture industries in New Zealand, Australia, Asia and the South Pacific. Core business includes import risk analysis, biosecurity risk analysis, environmental risk assessments and environmental management systems, aquatic animal welfare, disease diagnosis in a wide range of aquatic animals, development of feeding attractants for aquaculture, and development of medicated feeds for aquacultured finfish.

Sept. 1997 – Nov. 2003

Marine pathologist/parasitologist, Fish Health Unit, National Institute of Water and Atmospheric Research, Wellington, New Zealand. <http://www.niwa.co.nz/>

Job description: Provision of a pathology and disease diagnostic service for the New Zealand aquaculture industry, including commercial consulting work as well as government and industry funded research. Clients included private citizens, aquaculture and fishing companies, Regional Councils and the Governments of New Zealand, South Australia, and the Cook Islands. A significant proportion of my time was spent designing experiments, research programmes, and disease surveys, as well as providing disease related advice for FRDC and FRST funded research projects. In this job I was required to perform all aspects of basic and applied science related to the prevention, diagnosis, epidemiology and control of diseases of aquatic organisms including fish (marine and freshwater species), lobsters, *Macrobrachium*, rock oysters, flat oysters, pearl oysters, mussels, abalone, scallops and sea urchins.

Sept. 1996 - Sept. 1997

Manager, Recreational Fisheries, Primary Industries South Australia, Fisheries Department, Adelaide, South Australia. <http://www.pir.sa.gov.au/fisheries>

Job description: I was responsible for the preparation and formulation of fisheries resource management policies and options for ecologically sustainable development of recreational fishing opportunities in South Australia. I was required to attend national recreational fisheries management meetings and coordinate my work with other State fisheries managers. I also produced discussion papers on the management, development and funding of recreational fishing in South Australia; established a consultative process between government and the recreational fishing sector; managed a recreational

fishing fund; and reported to the Director of Fisheries and the Minister for Primary Industries on issues related to recreational fishing legislation.

Jan. 1993-Sept. 1996

Ph.D candidate, Department of Parasitology, The University of Queensland. <http://www.uq.edu.au/> Studies of the biology, ecology, taxonomy and control of *Cryptocaryon irritans* (Ciliata), the cause of whitespot disease in cultured marine fishes.

Job description: I was responsible for production of a PhD dissertation on the biology and control of *C. irritans*, an important pathogen of marine fish. The project required extensive fieldwork utilising linefishing, anaesthetics, cast nets, drag nets, and inshore trawlers for collecting various species of fish and shellfish from sites in impoundments, enclosed ponds, estuarine, coastal bar and coral reef environments in Queensland. Laboratory skills required included molecular biology (sequencing, PCR), electron microscopy (SEM, TEM), microscopy, and parasitological dissection. Awarded Doctor of Philosophy 25/2/97.

Jan. 1992-Dec. 1992

B. Sci. Honours candidate, Department of Parasitology, The University of Queensland. <http://www.uq.edu.au/> Studies of the development and chemotherapy of *Polylabroides multispinosus* (Monogenea), a gill parasite of cultured Yellowfin Bream, *Acanthopagrus australis*.

Job description: I was responsible for production of an Honours dissertation on the development and chemotherapy of *P. multispinosus*, a monogenean parasite of bream. The project required fieldwork and collaboration with the Port of Brisbane Authority and Seaworld on the Gold Coast, where sea cage experiments were carried out. Laboratory skills required included microscopy and parasitological dissection. First class honours awarded 18/12/92.

B. Sci. (1991).

University of Queensland, Brisbane, Queensland, Australia. <http://www.uq.edu.au/> Majors in Zoology, Environmental Science, Marine Biology, Aquaculture and Parasitology. Final year grade point average 6.1 (out of 7). Awarded Bachelor of Science 17/12/91.

Keynote presentations

June 2008. Pathogen risk analysis: experiences from 9 case studies – applications and limitations

Conference: Diseases in Asian Aquaculture 7 **Venue:** Taipei.

In 2008 I presented a keynote address on risk analysis in relation to national and international movements of aquatic animals and their related products. The presentation drew upon experience obtained from several biosecurity risk analyses conducted by Dr Ben Diggles and DigsFish Services Pty Ltd over the previous 8 years.

Further Education

May-June 2014. AQUAVET II, Roger Williams University, Bristol Rhode Island. This intensive 2 week course covered many aspects of the comparative pathology of aquatic animals and was specifically designed to teach aquatic animal medicine to veterinarians. It was sponsored by The University of Pennsylvania, School of Veterinary medicine, and the College of Veterinary Medicine at Cornell University.

November-December 2002. Asia-Pacific Regional Program on Molluscan Health Management Phase II. University of Queensland. Training workshop on diseases of molluscs in the Asia-Pacific region. Lecturers included Dr Mike Hine, Dr Judith Handlinger, Dr Brian Jones, Dr Bob Lester, Dr Sarah Kleeman and Dr Franck Berthe.

July - August 2000. Shrimp Pathology Short Course, The University of Arizona. An intensive 2 week shrimp aquaculture pathology short course run by Prof. Donald Lightner. The course outlined the history of disease in shrimp farming, the diseases, and contained practical diagnostic sessions covering histology, bacteriology, antibody assays (Fluorescent antibody tests, ELISA, Immunoblot, immunohistochemistry) and molecular diagnostic techniques (PCR, RT-PCR, ISH).

www.digsfish.com/UAZShrimpPathology.jpg

June 2000. Mollusc Histopathology Workshop, University of Tasmania. A 1 day intensive workshop focusing on histopathology of molluscan organs and tissues. Lecturer Dr Judith Handlinger.

June 2000. Crustacean Histopathology Workshop, University of Tasmania. A 1 day intensive workshop focusing on histopathology of crustacean organs and tissues. Lecturers included Dr Danielle Johnston and Dr Barbara Nowak.

May 2000. Fish Histopathology Workshop, University of Tasmania. A 2 day intensive workshop focusing on histopathology of fish organs and tissues. Lecturers included Dr Judith Handlinger, Dr Barry Munday, Dr Barbara Nowak, Dr Tish Pankhurst and Dr Mark Powell.

Other relevant qualifications and skills

- QLD Driver's licence, advanced and defensive driving training and over 30 years motorsport experience
- Restricted coxwains certificate and QLD speedboat drivers license with over 35 years on-water experience including 30 years research experience from smooth waters to high seas (including 45-50°S, Southern Ocean trawl surveys)
- Australian Maritime College Marine Radio Operators Certificate of Proficiency (MROCP)
- First aid -oxygen administration certificate
- Recreational diver
- Computer skills include Microsoft Word, Excel, Photoshop, Power Point, Internet, GIS

Scientific Referee

Dr Diggles conducts regular scientific peer reviews for a number of scientific journals, including *Diseases of Aquatic Organisms*, *Journal of Aquatic Animal Health*, and *Aquaculture*, as well as occasional reviews for several other journals and scientific publications.

Science Extension

Dr Diggles has developed several world's first science extension tools related to aquatic animal health and welfare, including:

NEATFish - the world's first paper-based and electronic resources for a national standard for the environmental assessment of recreational fishing tournaments

<http://www.neatfish.com/>

Ikijime.com, the world's first worlds first information portal for humane dispatch of finfish at <http://www.ikijime.com/> and instructional videos at <https://www.youtube.com/user/ikijime/videos>

Aquatic Disease Field Guide. Aquatic animal diseases significant to Australia: Identification Field Guide 5th Edition (including phone applications)

[https://www.agriculture.gov.au/animal/aquatic/guidelines-and-resources/aquatic animal diseases significant to australia identification field guide](https://www.agriculture.gov.au/animal/aquatic/guidelines-and-resources/aquatic%20animal%20diseases%20significant%20to%20australia%20identification%20field%20guide)

Dr Diggles has also written monthly educational science extension columns for the Australian Anglers Fishing World Magazine <https://www.fishingworld.com.au/> for over 25 years (since 1995) and contributed to a fish identification column (Fish Facts) in the USA Sport Fishing Magazine <https://www.sportfishingmag.com/> for 17 years (March 2003- March 2020).
